## SACRIFICE BY HINDENBURG TO STEM TIDE

Furious Counter Attacks Fail to Stop Advance of British Army

#### ITALIAN OFFENSIVE IS OF GREAT MAGNITUDE

May Result In Forcing Hand of Austria Who is Wavering

[ASSOCIATED PRESS TELEGRAM] New York, May 17 .-- The Germans have piled high their dead before the British lines but have failed to stop the British advance. The most furious and sustained counter attacks have withered before the blast of the British artillery and the sapping of the Hindenburg line goes on, slowly but without halt.

The tremendous efforts made by Marshal von Hindenburg to stem the tide of victory which was steadily setting against him have given the battle of Arras an appear ance of ebb and flow, but the net result is that the most violent efforts of the Germans to regain the initiative have failed. Von Hindenburg apparently used every ounce of strength at his command to wrest the British from the village of Bullecourt and the outcome is summed in the repetition by the British war office of the statement:

Our troops made progress in the Hindenburg line."

Possibly more omnious for Berlin in view of the wabbly condition of her Austrian ally, is the news of the great blow struck by Italy in the direction of Triest. The Italians have opened their spring offensive in brilliant fashion attacking on a wider front and apparently with greater forces than at any other previous operation. The Isonzo, a turbulent mountain stream bordered by mountains and cliffs, is in their hands for a distance of from 15 to 20 miles north of Gorizia. General Cadorna appears to plan a great flanking movement against the Corso plateau. The operation is, however, in too early a stage to permit judgment of its exact import.

Bulgaria of nationwide discontent and weariness of the war may be significant in connection with General Sarrail's campaign.

The Russian factions have patched up a truce but the outcome is still dubious. The news of the resignation of General Gurko and Brussiloff is now supplemented by a disquieting rumor that General Alexieff, Russia's commander-in-chief, and generally credited as her most brilliant strategist, is also about to resign his office. In any event, it seems certain that little can be ex-pected from Russia in a military way for a long time to come.

Stable Policy is Outlined In New Declaration Which Assures Solidarity,

[ASSOCIATED PRESS TELEGRAM] Petrograd, May 17, via London,

-The cabinet crisis has been settled. A declaration of the government's policy has been accepted by the representatives of the Council of Workmen's and Soldiers' delegates with merely slight alterations, and was signed by them at midnight. During the sitting M. Tchernoff, National Socialist, was appointed minister of agriculture, and M. Skobelief, vice president of the council of Workmen's and Soldiers' delegates, was appointed minister of labor. It was also decided to be desirable to include in the government Feedoro Kokoshkine, Constitutional Democrat, and a professor at the University of Moscow and M. Tseretelli, member of the Council of Workmen's and Soldiers' delegates. The duty of these men will be to

prepare for the constituent assembly. It has been decided to take into the cabinet five representatives of different Socialist groups, which with A. F. Kerenski, who assumes the war portfolio, will make a total of six of these groups sharing in the government. Three of these appointees will be Social Democrats, and three, including M. Kerenski, So cialist Populists. Of the former M. Skobeleff vice president of the council of Workmen's and Soldiers' delegates and M. Malantovitch, an Odessa lawyer, have been chosen definitely. The third appointment has not been made. Two of the Socialist Populist ministers will be M.

Tchernoff and M. Pecheknoff. As the result of two important events today, the prospects of a coalition ministry being formed were materially improved. First, the constitutional demo-

cratic party which practically controls the government has consented to its two ministers, Professor Manuiloff. Minister of Public Instructions, and A. I. Shingaroff, Minister of Agriculture, remaining in office. This, in spite of the resignation of Foreign Minister Milukoff, which is now definite. The second new factor is that the

"Charm-enormously," she replied. "Charm is genius, the genius of pleasing. If a woman has it it does not matter whether she is ugly or beautiful, twenty or fifty. But charm, unfortunately, is born in us. It cannot be acquired. A child of three may have charm; so may a woman of eighty. Children, in fact, have charm in its most natural aspect, but not all

#### American Women's Failing.

"Do you know," Mme. Bernhardt added, "there is but one thing with which I reproach the American women. It is that you do not care enough for children. You marry for love, and that is splendid, but so many women do not wish for children. What will they have to love when they are fifty? Not a man surely.

"I was a mother at seventeen and a grandmother at forty-two. I pity wo- by faithfully fighting the battles of men who wait till they are twenty-five our day as they fought the battles of to become mothers. They deprive themselves of life's greatest joy. They are old women before their daughters are grown up."

The interviewer asked Mme. Bernhardt about the woman who has lost or rejected the stock answers to the great questions of life-the woman who can find in existence neither plan nor purpose and who hesitates to thrust her own doubts and vacillations upon the generation ahead.

"I have no patience with such people," Mme. Sarah answered, with a dramatic shrug. "They ask why we are here. We are here through love. They say, What are we here for? Why, to love each other. They ask, Where are we going? Why, forward, onward, through our children. You Americans do not love enough. I see your men always together, your women always by themselves. The most important thing in life is to love and be loved. And to be loved when one is young, gloriously, completely, sheds a splendor over all of life. It gives golden memories which one may count over and over. And it keeps one

Religious Spirit Awakes. When asked what she thought would

e the effect of the war on life in France Mme. Bernhardt replied:

"The religious spirit of France has been awakened. After peace is declared the Catholic church will come into its former power and greatness. "War has proved the futility and limitations of human sympathy in a great grief that has touched every fireside. Religion only can heal the wounds of the spirit and the soul. France will emerge from the war a purified nation with high ideals, and she will become more and more strongly republic."

#### BRITISH SAVED THE ENEMY.

Rescued Prisoners After Submarine Sank Hospital Ships.

Only one of the incidents reported in the sinking of the two hospital ships Donegal and Lanfranc, showing the amazing difference between the morale of the Germans and British, is that old of the saving of a badly wounded Ra Serman officer by a British soldier nly less badly wounded.

While other German wounded prismers about the Lanfranc were fighting frantically to get into the lifeboats as the ship was settling and foundering was imminent this Briton left the struggling Teutons on deck and went below for one of their countrymen they had forgotten, carrying him up to a lifeboat barely in time.

Another signal contrast is seen in the action of the British patrols in walting around to pick up 152 German wounded, aithough in immediate risk of being

ON a number of occasions the newspapers have announced the return to the survivors of the Confederacy of flags which were captured during the war between the states The passing of more than fifty years since the close of that tremendous struggle has quenched the animosities which it had engendered, and the people of the north have many times stretched forth a fraternal hand to the people of the south. The hand has been grasped in the same spirit in which it was extended, but there have been rather few instances where captured northern flags have been returned to the survivors of the Union cause

Now comes an inspiring illustration of the growth of this spirit of fraternity on the part of the boys who wore the gray. Recent dispatches announced the pleasing features of the occasion of the captured flag.

There is not an American' worthy of the name who will not feel a warmer thrill of Americanism as he hears of Mme. Bernhardt, although seventy- such instances as this, which set a new two years old, is most fitted to give seal upon the reunion of the once dithe recipe of eternal youth. Her hair vided sections. The bitterness which was aroused by the action of President Cleveland when his first official act was an attempt to return to the ex-Confederates some captured battle flags has long since died away. I asked ing has been wiped out. The time must come when there will be no more "trophies" of the victory of one section of Americans over another.

A Truly American Day

An English officer viewing the ceremonies of Memorial day turned to a Chicago mayor and thus remarked:

"Not in all Europe is there a ceremony so impressive. Here it is not only a beautiful tribute to brave men, but commemorative of the fact that the country passed through a great crisis and was saved, disproving the world's assertion that a republic could not live. The healing of that breach made America immortal, eternal. And the sign of this immortality is a rosebud, tenderly dropped upon a grave.'

## NEW MEXICO OUR Battleflags GREATESTWARSHIP

With Simple Ceremonies Giant Sea Fighter Was Launched.

#### HAS TWELVE 14-INCH GUNS

Can Fire as Far as the Human Eye Can See, Although One of England's Vessels Is Carrying Fifteen Inch Guns-Burns Oil Exclusively and Equipped With Electric Drive.

When the superdreadnought New Mexico was launched in the New York navy yard the other day the biggest ship in the United States navy took to the waters. There was a marked difference this time from previous lounchings at the navy yard. The last dreadnought launched there was the Arizona in June, 1915, when thousands was the presentation to the regiment of invitations issued resulted in a multitude of spectators being on hand. This time the spectators were confined to the naval officials and the governor's party from New Mexico, numbering only about 300 instead of the 30,000 who saw the Arizona slip from the

The Arizona is 608 feet long and of about 1,000 tons less displacement than the New Mexico. The New Mexico has the same armament, however, in her main battery, twelve fourteeninch guns. Her speed is expected to be better than twenty-one knots.

There has been no dispostion on the part of the navy department to conceal the facts about the new battleship, official announcement having been sent out giving the principal measurements of the ship and particulars as to her complement, etc.

Statistics of the Warship.

The principal dimensions of the new dreadnaught are as follows: Length, 624 feet; breadth, extreme, to outside of armor, 97 feet 41/2 inches; displacement, 32,000 tons; mean draft, 30 feet Her armament consists of twelve fourteen inch guns, twenty-two five inch. four three-pounders, four anti-aircraft guns and two torpedo tubes She will be manned by 56 officers and 1,141 men.

The New Mexico is a sister ship of the Mississippi, recently launched at the yards of the Newport News Shipbuilding and Drydock company, and of the Idaho, still on the ways at the works of the New York Shipbuilding company at Camden, N. J. The keel of the New Mexico was laid on Oct. 14, 1915. Although her construction has been materially delayed, due to difficulty and delays in obtaining material

and the scarcity of skilled labor, it is expected to finish her within the thirtysix months allowed by the contract. When launched she was about 67 per cent completed. The navy yard is a busy place these days, with between 6,000 and 7,000

men employed. A short time after the launching of the New Mexico preparatory plans for the construction of the new superdreadnaught Tennessee were begun. She will be still more powerful than the New Mexico.

The New Mexico will burn oil exclusively and will be the first battleship built by any nation equipped with the electric drive. This system of propulsion has been thoroughly tried out in service on the collier Jupiter and has proved extremely satisfactory.

It has been pointed out by naval critics that the main battery armament apparently is not as powerful as that of the Queen Elizabeth and other modern fighting ships of the British navy, but that an inch difference in the big gun caliber could not have an appreciable effect in a great see fight.

Guna Shoot Far Enough.

It is admitted that the fifteen inch guns of the Queen Elizabeth have a greater range than the fourteen inch rifles of the New Mexico by something less than a mile. But according to naval experts the New Mexico's fourteen inch rifles will shoot as far as the spotter's range finders and fire control officers can see, and when a battleship is engaged by the enemy at sea. what is the use of additional range when it is impossible to spot the shells as they fall or record hits when the

aim is right? Officers say the fourteen inch guns of the New Mexico will throw shells as far as the result of the shots can be noted. If this is true, they ask. what is the use of too much range during a naval engagement? The vessel armed with the heavier guns would have to come into range of the one carrying guns which shoot as far as the spotter can see.

The New Mexico will have a concentrated bow and stern fire of half of the guns brought to bear in her broadsides. When she fires a broadside it will cost about \$12,000. The estimated expense of firing a fourteen inch rifle in \$1,000.

The main constructor in charge of the building of the New Mexico is Captain G H Rock. He has done his work during one of the busiest periods of American naval construction, and the New Mexico is regarded as one of the best examples of modern marine architecture over devised.

Rear Admiral Nathaniel R Usher. commandant at the yard, made strict police regulations in connection with the launching and no one who could Bot show proper credentials was allowed to susroach within 100 feet of the navy vard cates."

In many cases this is because the will be changed daily. farmer's boy has conceived the idea that he has no taste for farm work. Perhaps he has gone to some college or school that has educated him away from the farm. If so the education is not wisely chosen. When a boy who should be by inheritance 'a food-producer is diverted into some overcrowded profession in town-life. there is a loss of virile force.

While it is a good thing for young people to consult their aptitudes before deciding on their careers, they should not be too much influenced by mere fancy. It is a difficult thing to succeed in any career whether you like the work or not. If a boy can start in a business already created by his father, his chances of success are greatly multiplied, particularly in a business where the future seems so promising as in farming. It is the rule that people like any work that they can do successfully, even though it may not be strictly in line with the tastes developed by their school work.

With a great many young people it is simply a desire to get down near the white lights. They will find that the glamor of city life soon wears One winter of it will show them all they really care for in theaters and movie shows and city life hen they would better come God's country where there is a real working chance and friends to help them along. #### MINIMUM BASIS OF PEACE.

(Columbus Dispatch.) Germany, it is said, may ask peace without a cash indemnity and without annexations. A reichstag ommittee favors the return of the departed Belgian and Polish work men to their homes. The international Socialists who are to meet at Stockholm, are proposing that Beigium. Serbia and Rumania be retored and the disposition of certain other territories be left to a vote of

he people accupying them. None of these propositions, nor all of them together suggest the basis of a possible peace. Even if they went so far as to utterly thwart the ambition of the Prussian hund in setting out upon this war, that would not be enough There would still be no assurance of a world peace, for the disturbers, who for nearly three years have been using their tremendous power to destroy, would be left in possession, and they would be content with nothing but a renewal of prepara-

tions for another conflict. The armies of the allies are not coing to leave their terrible task half done. The world cannot afford to run the risk of another such out break of barbarism under the cloak of "kultur." Germany must reform herself or be reformed. The autocrat must go. The people must come into power.

#### Every Day Etiquette

Nerves Destroy Beauty. Nerves do more to destroy our efforts to make ourselves beautiful than any other one thing. Sleep and relaxation are two of the greatest foes to nerve troubles, yet most nervous people claim they cannot relax and insomnia is the burden of their nightly hours.

A wholesome daily regime consist-ing of a nourishing diet, sufficient exercise, baths, with hours for work and plays to serve as a palance wheel for each other, a well-ventilated room with comfortable bed, will, in most cases, ease the taut nerves, take the blood from the brain and so induce peaceful slumber. Avoid reading exciting stories or having disturbing conversation before bedtime. Half an hour before retiring sit quietly in an easy chair with the feet elevated

A daily walk in the open air is a tonic of inestimable value. Walking diverts the mind, brings unused muscles into play, stirs a lagging circulation, and when accompanied by deep breathing, gives new vitality to the blood through the increased oxygen supply, which comes as a natural sequence to deeper breathing.

A brisk walk in the morning or before retiring should be indulged in by those of sedentary habits. A walk in the country or suburbs on Sunday for business people is largely followed in many sections, and "hiking" parties covering from five to ten miles, are the very excellent fad at present.

There is only one way in which we may preserve our good looks and that is by daily care. Wrinkles when begin to form and deepen, when the hair falls, becomes lusre less or fades, the nerves are usually this snappy outfit, the coat being silk at fault and we should take all measures to control and strengthen them.

Buckeye Lake is receiving its tol of Granville visitors this spring. On Tuesday a party consisting of L. A Austin, Harry Price, Dr. J. Rohrer and his brother, Rev. Freely Rohrer, Chester Montgomery and Bert Everett occupied the Everett cottage at the lake and returned with a fine catch of fish.

Only sickness or absence from town can excuse one from attending the opera of "Martha" given tonight and tomorrow night in the Granville Opera House, by the cleverest cast yet assembled. The opera is full of action and swing, and the performers are right in time with their roles. There is nothing amateurish about this presentation. It will be a delight from start to finish. Several visitors have been admitted to rehearsal and they are enthusiastic in its praise.

Mrs. Frank Ray has received a cable from her husband, Prof. Ray who went to Russia about six months ago, stating that he had left that country on the 8th, and was sailing on the Venezuela, which will reach San Francisco the middle of June. Miss Helen Ackley who has been ill for a fortuight, is improving slowly.

Miss Mattie Jones is convalescing after a prolonged illness at Monomoy Place, in Broadway.

Misses Alice May George and Esther Martin will go to Dayton tomorrow to spend the week-end with Miss Grace Shenbarger.

### OHIO GUARD WILL BE SENT TO SOUTH FOR MOBILIZATION

Columbus, O., May 17 .- Headquarters of the Ohio National Guard here, according to Adjutant General Wod, has no official information from Washington that the Ohio guard will train in the south. He was unable to confirm reports purporting to come from Secretary of War Baker that it is the plan to have the Ohio and West Virginia National Guards in a training camp in Georgia or Alabama, nor had he any of-ficial information that mobilization probably will be ordered before

Special dispatches from Washington containing the information say the mobilization order will not be issued before July 8 and that the Ohio Guard will be sent in unite to the southern camp and not be mobilized in the state.

The governor's action in appointing Adjutant General Wood as a major general of the Ohio National Guard has created much discussion nere. The attitude thus far has been to accept the appoint ... nt faith and belief that Governor Cox would not have acted without knowing his authority.

### SUPPLY TRAINS **FOLLOW ADVANCE** OF BRITISH ARMY

British Army Headquarters in Mesopotamia, April 16.—Nothing more efficient than the lines of munitions and supplies serving the British forces in Mesopotamia can well be imagined. The days of muddle are ended and order, has been evolved out of chaos. All that human agency can do has been and is being done to turn past failures to success and to prevent future breakdowns in organization.

Communications by road, railroad and river has been laid out and developed on a well thought out plan. Facilities for the loading and unloading of vessels at Easra are now on an adequate scale. Stores in abundance are available and methodically controlled. Medical equipment has been introduced on a lavish, scale. An ample water supply is assured at every base and camp.

SAYS IT'S DUE TO TANLAG

"I feel so much better since I have been taking Tanlac that I want to tell others about it," sald Mrs. W. F. Smith of 1010 Chestnut street, Coshocton, in telling how Tanlac has built her up.

"I was all run down," she says. "and my stomach gave me trouble all the time. I didn't have much appetite, but what little I did eat disagreed with me. Gas formed after meals and made me feel bloated and stuffy. Things like cabbage gave me so much trouble that I just couldn't eat them.

"My nerves were edgy, and I got excited at the least little thing. I couldn't sleep soundly, and consequently I got up with a tired feeling. Headaches added to my miserable feeling.

"Since taking Tanlac I feel a lot better. My stomach doesn't bother me any more, and I can eat anything I want without feeling bad afterward. My nerves are in better shape, and I get a good night's sleep now. My headaches have left me too.

"Tanlac helped me so much that I think it will help others. That is why I am telling about my own experience.

## **FARMERS WARNED** OF GERMAN ERROR

#### Young Meat Animals Should Be Fully Developed.

#### KILL TOO MANY YOUNG ONES

This Will Result In Scarcity That Will Require Several Years to Overcome, According to Reports From Chicago Stockyards-In a Month or Two They Would Be More Valuable.

Farmers of the United States, of their own volition, are making the same mistake that agriculturists of Germany did under government compulsion, at the outbreak of the war. and the United States as a result will suffer from lack of meats later on. just as Germany is suffering now. according to reports from the Chicago stockyards.

The mistake is the slaughter of fattened or "unfinished" hogs, which are being rushed to the market in great numbers, partly to take advantage of the present high prices, which the average farmer thinks are too rumor which has spread throughout the country that the government is contemplating in the near future fixing maximum prices for food products.

Every day thousands of hogs weighing from 175 to 200 pounds are pouring into the yards to be slaughtered. By feeding them a month or two more they might be made to weigh from 250 to 300 pounds. The loss of meat by this kind of marketing is enormous.

When the war started the German government, realizing that the country was to be blockaded by the British navy, but thinking the war would not be a long one, ordered the immediate slaughter of a great proportion of its food animals. The result was a temporary plenty, but breeding stock was encroached upon, and as a result as the weary years went by there was an ever increasing scarcity of meat.

A crop of wheat or corn can be rais. ed in one season, but breeding stock on the farms cannot be replenished so rapidly, so that if the indiscriminate slaughter of immature stock does not cease packers fear that present prices will in another year be considered extremely low.

#### To Open Food Bureau.

'A food production bureau to act as a the farms of Cook county will be opened in Chicago by the Cook County Truck Gardeners and Farmers' association in the plan to increase the acreage of farm crops this summer along the lines suggested by the federal gov-

"The farmers of Cook county have been dependent to a certain extent upon labor agencies to get farm help," said Mr. Geweke, "but the class of help obtained from this source, of course, has been the expert help. What we will need now, if our crops are to be increased, are people to carry the crops through the weeding and harvesting season.

"We will be able to get enough expert farm help to plant the crops, as one man can plant as much as twenty men can harvest. But we must have some assurance that we will have labor to care for the crops after they

#### have been planted." Prefer Experienced Workers.

Mr. Geweke said that the Cook county farmers would ask the Chicago board of education to help them obtain boys and girls from the schools, who will be provided with permits. Bureau of Education Urges Them to Take Up Gardening.

The United States bureau of education has sent to all school heards of the nation an appeal for juvenile cooperation in increasing food production during the war.

Local authorities were urged to appoint a "garden teacher" for each 10% children between nine and fifteen years old who are willing to spend two or three hours a day in gardening.

Produce worth \$3,000,000 or \$4,000. 000 can be raised by school children in this way during the coming year, the bureau believes.

Second Base Play.

Second base is called the "pivot position of the infield." This is because most of the plays center around second base. Many double plays read "short to second to first, third to secand to flist, second to short to first. first to second to first," and so on Records show teams strong on double plays are usually teams well up in the e. Generally speaking, ability to make double plays speaks well for a large team's defense A good defense means few runs for the opposition, previded the pitching is of the proper kind Since second base is the pivot position. much of the team's success depends upon the way that base is played. If i the shortstop and second baseman work smoothly it usually has the effect of balancing the rest of the team. A club that is constantly mussing up plays around the second sack never causes much trouble for the opposition.-Billy Evans in New York World

Scandinavian Politeness.

Two points which attract the attention of travelers in Sweden are the punctilious honesty and truthfulness of the inhabitants. When asking for places at a theater, for instance, the ticket clerk never fails to inform the applicant if owing to a crowded state of the house a better position would be secured with a cheaper ticket than the one asked for. Again, when par cels are taken by steamer from Stock young beef animals and improperly holm to country places in the neighborhood they are just placed on to the quay, where they frequently remain half a day without being claimed It never seems to occur to any one that they could possibly be taken by anygood to last, and partly because of a body but their rightful owners. On a canal trip of any length a little book lies in the saloon of the steamer, in which each passenger keeps his own account of the number of meals, cof fees, etc., he takes during the journey

#### The Clever Brahman.

· Speaking of the great power, the Brahmans in India possess in localizmg thought, a prominent Brahma i once said: "We would consider a game of chess as played in this country mere child's play. An ordinary Brahman chess player could carry on three or four games at a time without inconvemence. The usual game played by the Brahmans consists in checkmating with one pawn designated when the play begins. I have seen a man per form a long problem in multiplication and division, at the same time noting the various sounds and discussions go ing on about him in the 100m. I have seen a man compose a triple acrostic in Sanskrit in a given meter, at the same time having three well versed men trying to overthrow him in his argument on religion."

At the base of this stands a big solitary column which is known as Vasco da Gama's pillar. The lighthouse which here illuminates the meeting place of the Atlantic and Indian oceans is one of the most important and most useful of its kind. It is visible from a distance of thirty-six miles. The cliff scenery is wild and sublime, the rocks are magnificent, and the farreaching sea, with the fierce surf beating on the iron bound coast, is impressive. In the water directly beneath the cliff sharks are abundant.

## UNCLE SAM MAY BE GREATEST SHIPBUILDER IN

More Than Two Million Tons of Shipping, Suitable For Carrying Supplies to Our Allies, Are Being Built or Contracted For

T.7ESSELS suitable for carrying food, | ammunition and other supplies to our allies in Europe, approximating more than 2,000,000 tons, are being built or have been contracted for to be built in the shippards of the United States. Today the United States is doing the greatest shipbuilding business in its history, and if the war continues for two or more years it may become the greatest shipbuilding nation in the

Including vessels built for American owners, foreign owners, undisclosed owners and builders' accounts, adapted for deep sea service, it is estimated that there are 644 in course of contimated tonnage of 2,394,131. These figures are exclusive of ships under construction for the navy department, oil and molasses tankers, vessels constructed for use on the great lakes and

those under 500 tons. Of this amount of tonnage more than 300,000 tons already have been launched, about 70,000 tons are scheduled to be launched this spring, about 177,000 tons to be launched during the summer, about 210,000 tons launched next fall, more than 600,000 tons launched next winter and more than 900,000 tons launched and completed in 1918.

#### Deep Sea Commerce.

Of the vessels built for service on the great lakes, approximating 70,000 tons, a number of these could in an emergency be used for deep sea com-

On Feb. 9 the department of commerce issued a report showing the number of vessels of all types of 300 tons and over. This was the last official report on shipbuilding issued, and

The construction of new yards and the enlargement of old ones will involve the expenditure of millions of dollars.

#### \$2,000,000 Plant.

One of the largest of the new plants will be built for the Baltimore Drydock and Shipbuilding company. The blans call for the construction of one plants on the Atlantic coast. The company has an option on a site at Baltimore. The new plant will cost more than \$2,000,000 and will furnish employment to 2,000 additional men. On April 1 of this year there were

capacity of Great Britain is may be gleaned from the fact that at the beginning of the war, exclusive of the plants in her colonies, she had 453 **shipyards, marine engine and** boller shops, while her repair plants included 572 drydocks and marine railways.

The United Kingdom turned out 700. **000 tons in 1916 and 659,000 tons in** 1915. This year it is estimated the amount will reach 1,250,000 tons. At 2,294,131. the beginning of the present year there were 403 vessels, with a tonnage of 1.495.601, building in the yards of the United States. This number was made cargo vessels, 7; car floats and ferries, 5; miscellaneous craft, 18.

#### Orders For New Ships.

Since the first of the year orders for new ships have swamped the builders. The Bethlehem Steel company furnishes an illustration of this. Today the company in its various subsidiary yards is building more than 175 vessels. About sixty are under construction at the Fore River yard and a similar number at the Union Iron works, two

of its largest plants. The same conditions prevail among the shipyards on the coast. The case of the Hanlon Dry Dock and Shipbuilding company of Oakland, Cal., is typical. On Jan, 1 its employees numbered; 350. It has so many contracts for vessels now that it is enlarging its plant to such an extent that by June 1 it will

have 2,500 men at work. On April 13 thirty-five shipbuliders called at the offices of the Federal Shipping Board at Washington and signed contracts for a large number of the 1,000 wooden versels of 3,000 tons each which the United States government, under the direction of Major General George W. Goethals, will have constructed "to bridge the Atlantic," carrying supplies to our allies on the other

real estate broker, leased to the government and to the Foundation company of New York a tract of fiftyfive acres of land in the Newark meadows, with a frontage of 1,650 feet on the Passaic river, for the location of an immense shipyard.

#### American Merchant Marine.

The Foundation company has received a large contract for the construction of the fleet of ships for the American merchant marine. The company will begin work at once on the plant, as the contract with the government allows only thirty days for the work. The building of wooden ships does not require an elaborate plant. Practically all that is needed are the ways (a struction or contracted for, with an es- | ship railway), housing for the tools and a power plant.

Ten ways, each 100 feet wide, will be constructed, and there will be a space of sixty feet between the ways so that material may be easily handled. The ways will be so constructed that the vessels, when the hulls are accomplished, will slide into the Passaic river, which will be dredged to a sufficient depth at this point to float them.

#### Big Lumber Mills.

incidental to the building of the Goethals fleet of wooden ships it was learned that the government is cornering the product of big lumber mills all over the country. It is understood that the federal authorities have requisitioned 3,000,000,000 feet from the southern mills alone, principally Georgia, Florida and Louisiana yellow pine.

It is going to be extremely difficult, according to A. R. Smith, editor of the Marine News, to get a sufficient number of ship carpenters to build the fleet of wooden vessels as fast as the government wants them turned out.

With the building of all steel ships it is unlikely that any further official and the lessened demand for wooden reports will be made while the coun-, once the blg majority of ship carpenters have had to look for other em-

#### HOW CAPITAL SIZED UP ARTHUR JAMES BALFOUR

Wears Frock Coat and Striped Trousers-Movements Suggest An "Outdoor Man."

Washington has sized up Arthur James Balfour in this way:

Five feet ten and three-quarter inches in height.

Weight 155 pounds or thereabout. Of slender figure, with narrow shoulders that stoop slightly, but very long, sinewy arms-a figure unusually athletic for a man of sixty-nine years.

The Balfour head is long and parrow, with an overhanging brow, "bulging" type. It is covered with gray hair, at the temples trained down to a thin skein of whiskers that extend an inch along the cheek.

The Balfour face is "sharp," though the mild gray blue eyes detract somewhat from the general impression gained when the Balfour countenance is in repose. The nose is aquiline, al-

most hawklike, with prominent bridge. The Balfour eyes are rather prominent, ordinarily steely and penetrating save when the Balfour smile comes into them to radiate over the entire face. This smile is infectious-"winning," it might almost be called.

When the Balfour smile is workingwhich is most of the time-there is little in the expression to suggest the "bloody Balfour" of Fenian days when the then secretary of foreign affairs for Ireland was compelled, with firm hand, to stay frequent disorders.

The Balfour voice is that of the orator and linguist. It possesses all the charm of the well cultivated English vocal vehicle. It is soft, modulated, almost to a whisper at times, though it is decidedly resonant when roused in public speaking.

The chief use Mr. Balfour makes of his brilliant power of speech is to keep it out of action most of the time. He is an eloquent listener, his smile taking the place of speech.

While engaged in official missions, such as that which brings him to the United States, the British secretary for foreign affairs garbs himself much as he does when he goes to parliament. The chief features of it are a long frock coat that flaps around his knees, gray striped trousers, comfortably square toed shoes, a black string tie and a narrow brimmed slik hat that appears to sit uncomfortably on his

The Balfour walk and movement suggest "the outdoor man." His stride is long and swinging, and he moves along at a very rapid guit.

The Balfour diversions-he is a bachelor-tare bleyeling, golf and almost boyish fondness for dime novels of the "shilling shocker" sort and profound works on philosophy. "England is getting a lot more submarines than you people in America have any idea of.

"The submarine commanders are having a rough time of it. Their bases are sought out and destroyed almost before they are established. The British know of certain bases, but they let gone, then destroy them and leave the

VOU have probably seen some of I our men "demonstrating" in the stores how we toast the tobacco for Lucky Strike cigarettes.

It is one of the most interesting little glimpses you have ever had of a new manufacturing idea.

Here's what they do:

They put a handful of Lucky Strike tobacco into a small pan and offer you this to sniff the fragrance.

Then they toast the tobacco over a flame and again offer it to you.

You notice at once how the flavor is brought out and increased by this toasting.

You owe the delicious new Lucky, Strike Cigarettes to our development of this simple idea. We found that toasting not only improves flavor (as you have actually noticed) but by our process it seals in this flavor and delivers it to you fresh in the cigarette. In a word peace without annexations or

contributions. The declaration further meets the council's demands by promising to take steps toward the attainment of an agreement with the allies which will realize the government's declaration of April 9. The government, however, is convinced that Russia's defeat in the war would be a great misfortune to all nations and while willing to make a general peace on

the west. The government consents to the council's demand for the democratization of the army, but desires to combine it with a strengthening of Russia's fighting forces. The declarations meet half way the council's heavy woolen and rubber clothing Socialist program by promising fur-ther control over the production, for all the men now on their way to the men. The crews of every detransports, sale and distribution of products; measures for the better protection of labor; the right to a settlement of the land question by the constituent assembly; increased direct taxation of wealth; development in a democratic direction of local self-government, and the hastening of preparations for the con-

stituent assembly. In return the government demands such full confidence and support as will enable it not only to fight a reactionary counter-revolution but also to make measures against the an-

archists of the extreme left. A new feature was injected into the situation by the demand of the peasant congress which began its sessions here yesterday, that its representatives participate in the discussions. The government and counpeasant representatives will join the

Dispatches by way of Stockholm seven and a half and others from Minister Gutchoff say he quit the and army and navy. His resignation is regarded with apprehension by the friends of liberty.

Another telegram said that the military council of war has issued a proclamation declaring a separate peace is unthinkable and urging the army to exert every effort in the defense of Russia.

The Danish Socialist Leader Borjberg, who has returned to Copenhagen, from Petrograd is quoted in the newspaper Poli Tiken of May 13 as saying that upon his own initiative he had succeeded in establishing a connection between the workmen's and soldiers' delegates at Petrograd and the majority of the So-

cialists in Germany. A summary of the interview cabled to the government here says that who were in a position to give an exact statement for the majority of Socialists and labor unions in Germany. They submitted to him a program of questions which they suggested could be discussed at a possible peace conference.

At Petrograd Borjberg was invited to attend a conference on the subject with Socialists and workmen. The result of the conference was that the council decided to discuss the question of attending an international peace conference at Stockholm. Out of regard, however, for the position of French and English socialists, the council thought it advisable to take the matter in their own hands. It would be its aim, Borjberg said, to have the various contemplated conferences at Stockholm turned into one joint confer-It was believed that under these circumstances the invitations which the council intended to send to the French and English Socialists

would be accepted. Information received by the gov ernment bera indicates more and more that the Socialist movement is entirely influenced by the German government.

#### AMBASSADOR PENFIELD **ARRIVES IN AMERICA**

New York, May 17 --- Frederic C. Penfield, American ambassador to Austria, up to the time diplomatic relations were severed, arrived here vesterday on a French steamship. Cable reports that the French liner Rochambeau, on her last outward voyage, was attacked by a German submarine, were confirmed by arrivals yesterday who were on the Rochambean at the time. The tornedo, fired without warning, missed the liner by less than a dozen rods, they said. The speed of the vessel and the zig-zag course she was following, saved her, it was asserted. Nothing was seen of the U-boat.

## DESTROYER CREWS **SEND MORE CLOTHES**

[ASSOCIATED PRESS TELEGRAM] Washington, May 17.—The port from Queenstown that the sailors of the American destroyer flotilla, which has arrived in the -war zone were not supplied with warm enough clothing for the cold latitude, was explained today by the fact that the destroyers sailed from American ports before the supplies could be put on board. Complete outfits of

stroyer which has left subsequently have been completely outfitted To the women of the United States is due the credit for this guarantee of protection. Under direction of the Navy League thousands of American women have been knitting woolen garments and a special fund has been raised to buy rubber coats and felt

boots. American warships have never before been called upon for service in such cold climates and therefore the regulation clothing outfit was not suitable for the North Sea service

against submarines. Secretary Daniels recognized this fact and in-an official order called upon the Navy League to aid American women in supplementing the bluejackets clothing. In almost every city this work is under way under the direction of the Navy League, and it will be continued until every man in the American navy is thoroughly equipped for any war service. A committee is now out trying to see a few of the people in advance to subscribe toward this fund. Tonight is industrial night at the

tabernacle, and the different shop and factory delegations will come to the tabernacle in a body.

Shortly after the noon hour tomorrow an open-air meeting is scheduled for the square. It will be conducted by members of the Bromley party.

There was a meeting at the tab ernacle last night of the Sunday school officers and teachers when final arrangements for the parade were made.

### INDUSTRIAL EXPO. ADVERTISED OVER **TOWN AND COUNTY**

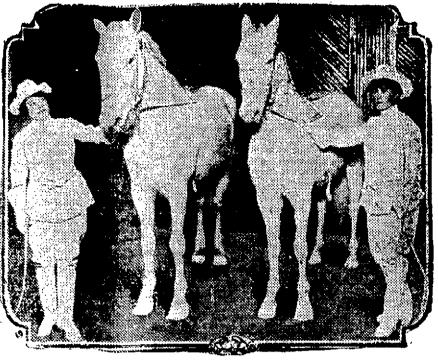

The Publicity Committee of the Retary club has begun its program of advertising the big Manufacturers' and Merchants' Exposition to be held in the Tabernacle, May 28 to June 2.

Large bills and placards are being printed which will be posted in Columbus. Zanesville. Somerset. Thornville. Johnstown, Croton, Alexandria, Hebren, Buckeye Lake. Granville and other towns of Licking and surrounding counties. The work will be done by Rotarians. who will take their automobiles and canvass the territory on their adver-

lising mission. Advertisements are being prepared for insertion in the Newark and country papers telling about the features of the exposition, partieularly the displays of the 60 exhibi-

The main purpose of the exposition is to make the products of Newark plants and mercantiling establishments better known and appreciated at home and abroad. The slo-gan is, "Business as Usual," and the entire proceeds will be devoted to the war relief fund.

In an appeal to the Newark women for greater interest in the work for the local committee, American Fund for French Wounded, a condensed re-, port of the work done since last November has been included. The work is an auxiliary to the great hospitals in France where there is great need for hospital supplies and articles which confront soldiers recovering from wounds or sickness. France's hospital facilities have been overtaxed and but for the help received from America the soldiers of France would be deprived of many comforts and necessities. The Newark committee has just forwarded its fourth shipment of supplies to the Paris headquarters.

The boxes contain surgical dressings and hospital supplies as follows: 6:45 p. m.-Young men's meeting 34 gauze metres, 16 gauze compresses, 267 bandages, 65 yards of adhessive plaster, 20 muslin arm sling, 28 hospital shirts 33 bodspreads

> Previous consignments of boxes ave been sent Jaunary 20, 1916. Feb. 22 and April 7 of this year. The valuation on each shipment has been approximately \$125.00. These boxes are sent to the A. F. F. W. headquarters in New York, 122 Madison avenue, who forward them to the distribution station in Paris. In each case of boxes sent, the Newark committee receives a personal acknowledgement of the arrival of the boxes and the distribution of their contents.
